## Financial results overview (2Q of FY03/2024) <br> (company-wide)

## Financial results overview（company－wide）

## Lower revenues／Lower earnings

Both Analytical Instrument and Automatic Recognition segments achieved higher revenues／earnings， but for Semiconductor segment，demand stayed at low level

【Analytical Instrument Business】 Higher revenues／Higher earnings：Revenues were higher in many fields，and also sales of customized systems and overseas sales could go strong
【Semiconductor Business】 Lower revenues／Lower earnings：
Stock accumulated，especially of memories
Demands related to cars and renewable energies were steady
High level of order backlog is still maintained
【Automated Recognition Business】 Higher revenues／Higher earnings：In every subsegment

## Overview by segment

2Q of FY03／2024

【Net sales】：Analytical Instrument and Semiconductor segments account for 95\％， each with almost same amount
【Operating profit】：These segments accounts for about $30 \%$ and $70 \%$ respectively

| （mil．yen or \％） | Net sales | Sales share | Operating profit | Operating profit share |
| :--- | :---: | :---: | :---: | :---: |
| Analytical Instrument Business | 8,064 | $47.1 \%$ | 779 | $30.7 \%$ |

## Financial results overview（by segment）

Analytical Instrument Business

## Higher revenues／Higher earnings

【Higher revenues】Sales of consumables for many fields， sales of instruments increased，and overseas sales is going strong

| （mil．yen） | FY03／2023 <br> $1-2 Q$ | FY03／2024 <br> $1-2 Q$ | $+/-\%$ | $+/-$ amount |
| :---: | :---: | :---: | :---: | :---: |
| Net sales | 7,339 | 8,064 | $+9.9 \%$ | $+\mathbf{7 2 4}$ |
| Operating profit | $\mathbf{6 5 3}$ | $\mathbf{7 7 9}$ | $+19.3 \%$ | +126 |

## Factors，etc．

＜Domestic net sales＞
【Higher revenues】
－Sales of consumables increased in many fields
－In particular，sales of standard reagents，LC／GC components，consumables related to sampling and after－ sales services could go strong
－Sales of instruments also increased
－Products for mass spectrometers in pharmaceutical， environment，and water quality analysis
－Customized GC systems for carbon neutral researches
＜Overseas net sales＞
【Higher revenues】
－Pharmaceutical products markets expanded in almost every region
－Sales of consumables especially LC columns are going strong in Asia，Europe and Latin America
－Sales of OEM products for overseas companies are also still going strong

## Analytical Instrument Business

(comparison with other companies)

Domestically, sales staff with technical expertise in analytics sell instruments after offering applications adapted to each customer's needs and roll out their business around sales of consumables necessary after installation

|  | What to sell | Product knowledge | After sales | Profit rate |
| :---: | :---: | :---: | :---: | :---: |
| Instruments makers in general | Only their own products | Only for their own instruments | Mainly support for maintenance and updates |  |
| Distributors in general | Wide variety of products from partnering makers | While dealing with various products, they sometimes need support of makers concerning professional domains | Consumables are also offered as needed Availability of technical consultations is limited |  |
| GL Sciences | Own products plus third-party products | Also for thirdparty products by applying knowledge of our own products | Consumables are also offered as needed <br> Not only responding to technical consultations, applications (applied data) are offered | By selling our own products, better profit rate can be achieved than pure distributors |

## Analytical Instrument Business Sales trend by region

Over 70\% in Japan, just less than 30\% overseas (mainly in Asia), both maintaining steady growth

| Operating profit | 2,065 | 1,709 | $-17.2 \%$ | -355 |

Factors，etc．
【（negative）Demand drop】
－Stock accumulated，especially of memories
【（positive）Market trends】
－There are steady demands for those used for cars and renewable energies
－Demand expansion in the field of generative AI
$\rightarrow$ Business improvement is actively promoted such as exploiting new demands
【（positive Order backlog】
－High level of order backlog is still maintained

## Semiconductor Business <br> Sales trend by region

## Financial results overview（by segment） Automated Recognition Business

## Higher revenues／Higher earnings

【Going strong】Sales of products integrated into devices for housing，medical use and entry／exit security

| （mil．yen） | FY03／2023 <br> $1-2 Q$ | FY03／2024 <br> $1-2 Q$ | $+/-\%$ | $+/-$ amount |
| :---: | :---: | :---: | :---: | :---: |
| Net sales | 684 | 881 | $+28.8 \%$ | +197 |
| Operating profit | 11 | 48 | $+302.1 \%$ | +36 |

Factors，etc．
Higher revenues／earnings were achieved in every subsegment（＂Products integrated into instruments＂，
＂Finished products＂and＂Others＂）
【（positive）Trend towards improvement】
－Stagnated production of upper－tier instruments due to insufficient supply of semiconductors was resolved
$\rightarrow$ Shipment pace recovered for products integrated into instruments and high－function tags
【（positive）Steady growth】
－Products integrated into devices for housing，medical use，as well as entry／exit security
【（positive）Active promotion】
－UHF band IC tags for materials management have joined to our portfolio
$\rightarrow$ Aiming at further entrance to new markets，such as management of rental temporary construction materials

## Measures and progress

## Each segment has proactively promoted its efforts to business improvement

Measures
Progress (1-2Q)

| Analytical Instrument Business | - To strengthen sales of LC columns | - Overseas sales took the lead, and both quantity and monetary amount have stayed at higher levels than the previous FY |
| :---: | :---: | :---: |
|  | - To expand business areas in relation to the next-generation energies and carbon-neutral technologies | - Sales keeps going strong. Our gas chromatograph systems contribute to researches not only for ammonia analyses but also for synthesizing fuel gases such as methane from $\mathrm{CO}_{2}$ |
| Semiconductor Business | - To respond to the control over export to China by the USA | - There has been no significant movement recently, but sales activities continue to be promoted targeted at makers of semiconductor manufacturing devices in China in view of risks of regulations which might be tightened in the future |
| Automated Recognition Business | - To put devices equipped with secure microcomputers to market | OEM development of finished products for major security companies is promoted, and applications of products integrated into devices for public transport should be further expanded |
|  | - To start providing solutions targeted at parking markets | - Prototypes already developed were successfully delivered during the first quarter, and then during the second quarter performance evaluation on trial instruments, verification in actual market environments, and discussion on development towards mass production started |

## Performance/Dividend forecasts (FY03/2024)

Performance/Dividend forecasts (FY03/2024) (company-wide)

< Reasons for amendment >
Decrease in Net sales (factors)
【Semiconductor Business】
Increase in Net profit (factors)

- Effect of gain on receipt of national subsidy
(Subsidy provided to Semiconductor Business (AISINTEC Co., Ltd.))
- Prolonged inventory adjustment of memories in semiconductor industry
- Demand drop for smartphones and PCs
< Dividend forecast >
Increase by 10 yen from 60 yen to $\mathbf{7 0}$ yen

## Sales of our original consumable "Inert Family*" is going strong

Assuming annual average sales of Inert Family during FY03/2020 (before COVID-19) as 100\% (baseline), that of FY03/2024 has reached 55\% at the end of the 2Q

Note: Data are of GL Sciences alone, meaning overseas consolidated subsidiaries are not included

> Inert Family: Among the original consumables manufactured by our Analytical Instrument Business segment, this is a principal product line and contributes very highly to overall profit. There are mainly three types: Original LC column, Solid-phase extraction cartridge, and GC column.

## New release <br> Laboratory information management system "GLIMS"

GLIMS is a kind of LIMS (Laboratory Information Management System) developed with a concept of high customizability such as "a flexible system that matches various laboratories"
It unifies management of analytical operations such as progress, traceability, evidence record, sample and analysis information; realizes improvement in productivity and reliability of a laboratory; and supports DX and remote working.

## 【Points】

- Unifies management of data obtained at laboratories
■ GL Sciences knows how analyses are carried out and defines customers' requirements according to their specific circumstances
- CSV (Computerized System Validation) is also supported
- Planned to be rolled out to e.g. pharmaceutical companies including generic drug makers

2 Q of $\mathrm{FY} 03 / 2024$
